

**Therapies that cure
RESTORE submitted proposal for stage 2**

The consortium "RESTORE Health by Advanced Therapies" submitted the proposal for the Large scale Research Initiative preparatory action phase on September 18, 2018. RESTORE is supported by more than 250 stakeholders from science, industry, non-profit organizations and patient representatives throughout Europe and beyond (USA, Asia), underlining the importance of Advanced Therapies for the scientific and public society.

The European Commission (EC) are creating Large scale Research Initiative to enable new approaches for cooperative research in Europe. They are science- and technology-driven, large-scale multidisciplinary re-search initiatives. The aim is to attract the best scientists and to establish long-term centers of excellence in Europe leading worldwide in their field.

We are grateful to all those, who supported us with their commitment and we are looking optimistically towards the EC decision on 29. November 2018.

The RESTORE founding partners are world leaders from academic and clinical research and industry: BCRT/Charité – Universitätsmedizin Berlin (Germany), University of Zurich (Switzerland), Cell and Gene Therapy Catapult (United Kingdom), TissUse GmbH (Germany), Pluristem Ltd (Israel), Miltenyi Biotec GmbH (Germany), INSERM – Institut National de la Santé et de la Recherche (France), Innovation Acta S.r.l. (Italy), Fondazione Telethon Milan and University Minho.
